THE TRAGEDY OF FLIGHT:A
COMPREHENSIVE CRASH
ANALYSIS

once an accident sitting has been When pilots misread next to determined in Flight an exit airplane we have equipment, misjudge weather conditions to investigate row about that crash analysis panic First they behaviour and major want sounds will when the pilot If this crash is security influence their Fail to happening and if behaviour properly there is time, the address pilots will inform mechanical the passengers to positive words perform for an emergency landing errors and motivation related words pilot error is considered as the number one reason why this plane crash is happening Thoughts... OUR VIEWS Needs... ABOUT AIRPLANE CRASH Work... Feelings... They might Feel sensation of For the Passengers weightlessness First time it will ask For will be security incredibly First stressfull They would be shock They want to head for it can cause the gate breathing problem and with they Feel swagger insecure
